Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 8-11, and 27 drawn to a probability distribution method of asset valuation, classified in class 705, subclass 36.
 - II. Claims 4, 12-19, and 21-26 drawn to a data management method in market analysis, classified in class 705, subclass 10.
 - III. Claims 5-7 and 20, drawn to a method of displaying financial information, classified in class 345, subclass 440.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, and III have separate utilities such as:
 - a) the probability distribution method of asset valuation can be used to perform portfolio selections without a real-time data feed or graphical user interface (GUI);

Art Unit: 3628

b) the data management method for market analysis can use a different market techniques other than the probability distribution and by not using GUI as the display output.

c) the method of displaying financial information does not require the method steps of probability distribution or a step of real-time feed data.

See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I, II, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Mr. David Feigenbaum (Reg. 30,378) on September 11, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3628

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jeffrey Pwu, whose telephone number is (703) 308-7835.
